CALD Communities and Disability

Accessing Disability Services by People from CALD Backgrounds in Australia

The study examined whether differences in access to specialist disability services by people from CALD backgrounds when compared with those born in Australia represent a service gap or the healthy migrant effect. It outlines findings on the proportion and severity of disability in CALD communities.

Changing Disability Status of Immigrants in Australia – Three Cases

Through an in-depth analysis of three immigrant groups, this paper examines the changing disability status over five years of those born overseas who have lived in Australia for various periods of time. The research found that age is the most important factor influencing the trajectories of disability profiles of immigrants.

CALD Communities and the NDIS

A View from the Back of the Bus: a reflection on the need for a culturally responsive NDIS

In this Inner Sydney Voice article, Diana Qian, President of the Diversity and Disability Alliance, states that people with disability from CALD backgrounds make up only a small proportion of people who are currently disability service recipients. She argues greater resources are needed to ensure people from CALD backgrounds have equal access to the NDIS.

Future Ability Report: Multicultural communities getting NDIS-ready project report

Settlement Services International (SSI) developed a project to support CALD communities access disability services. The project was called FutureAbility and in 2016, SSI released a report summarising the process and findings of the project's first four phases. A range of strategies and initiatives were implemented to empower and support ethno-specific and multicultural organisations to enter or transition to the NDIS and to increase CALD communities' knowledge of and participation in the NDIS.

Disability and Refugee Communities

Humanitarian Arrivals with Disabilities Discussion Paper

This Refugee Council of Australia Discussion Paper identified issues impacting humanitarian arrivals with disability. These included lack of data and information on new entrants with disabilities, lack of adequate on-arrival support and difficulties accessing an appropriate diagnosis. The paper also discussed how a move to the NDIS will impact newly arrived communities.
