Community Education Sessions

What do our sessions involve?

The Multicultural Health & Support Service (MHSS) aims to address the poorer health outcomes experienced by people from refugee and migrant backgrounds, as well as international students, around sexually transmissible infections (STIs), hepatitis B, and other blood borne viruses (BBVs), like HIV/AIDS.

Our education sessions also focus on healthy and respectful relationships, consent, gender equity, contraception and cultural understanding.

We work with communities to increase understanding of health issues and the health sector. We tailor our information in a culturally responsive way that aims to decrease stigma and discrimination and empower individuals and communities.

Book a session today

We provide FREE community education sessions to people from refugee and migrant backgrounds, asylum seekers and international students. A fee may apply to tertiary institution providers. We're flexible in our presentations and can explore other related topics. We also offer online sessions.

CONTACT US to discuss what sessions you would like delivered & how - Piergiorgio (Pier) Moro,

Training - Workshops - Groups - Events

Workforce Development Forum

In person and online forum - bringing together workers and practitioners from a range of sectors to share information, enhance service coordination, and improve communication and engagement among migrant and refugee communities on sensitive issues.

Issues covered include sexual and reproductive health, blood borne viruses (BBVs), and healthy relationships.

Advisory Body

The aim of the group is to identify ways to work together to progress the action areas highlighted in the MHSS annual plan, ensuring that people from migrant & refugee communities are part of the ongoing dialogue on STI prevention, treatment, and support.

The group offers you the space to advocate and plan activities.

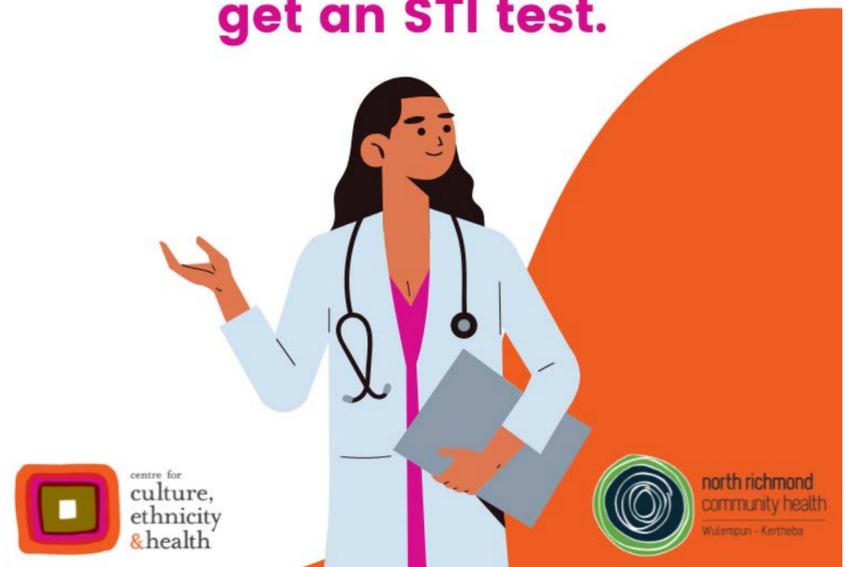

To get involved or to find out what it offers, CONTACT - Piergiorgio (Pier) Moro, (M) 0438 657 093 | (E) piergiorgiom@ceh.org.au

Training Sessions for Professionals

We offer training and resources to health & welfare service providers about blood borne viruses (BBVs) & sexually transmitted infections (STIs).

We also assist agencies in how best to engage with communities on highly stigmatized and sensitive topics, such as sexual health, in order to improve culturally competent service delivery.

Sexual health doesn't stop for COVID-19.
Visit your local health clinic to get an STI test.
